Mr. W. H. Britton, President
Westinghouse Materials Company
of Ohio
P. O. Box 398704
Cincinnati, OH 45239-8704

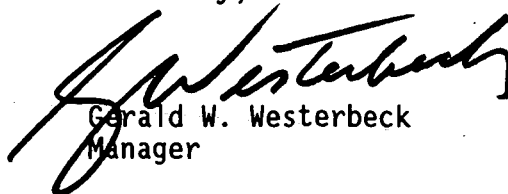

Dear Mr. Britton:

WET STACK SAMPLER FOR OXIDATION #1 FURNACE

The enclosed Removal Site Evaluation for the Wet Stack Sampler for Oxidation #1 Furnace has been reviewed by my office. Based on this review, DOE has determined that this work does not constitute a removal action due to the control measures noted within the RSE. Therefore, the waste associated with the construction and demolition of this project can be removed and dispositioned following the specific control measures noted within the RSE document and per the radiological guidelines specified in the FMPC Site Policy and Procedures, FMPC-720. The Administrative Record for the RI/FS should include this document and a final report shall be issued, which addresses the volume of construction waste.

If your staff has any questions, please ask them to contact Robert J. Janke at extension 6883.

Sincerely,

Gerald W. Westerbeck
Manager
